

WINDERA S WARRANTY

ENNERA ENERGY & MOBILITY S.L. (hereinafter ENNERA) guarantees the WINDERA S wind turbine against any design, material and manufacturing defects under the normal conditions of use of the product.

The warranty period for the WINDERA S is 24 months, counted from the start-up date, or 30 months counted from the date of its delivery to the customer, whichever happens first.

During the warranty period, ENNERA shall repair or replace, at its discretion, the defective parts or components.

The warranty covers all the components specified in the Scope of Supply. The costs of the components and the associated labour costs for their repair or replacement are included in the warranty conditions. ENNERA shall assume the transport costs of the components to be repaired.

Not included within the scope of the warranty are:

- Materials, components and equipment that have not been manufactured or supplied by ENNERA
- Components or equipment that have been modified without the prior and written consent of ENNERA
- Repairs carried out by personnel not authorized by ENNERA
- Damage caused due to improper use of the equipment
- Damage caused by lightning strikes
- Damage caused by extremely high winds in excess of 52.5 m/s, calculated at the hub height (Class III), in accordance with the provisions set forth by IEC 61400-2.
- Damages caused by contact with foreign objects or agents
- Fluctuations in the electric grid outside of the range considered normal by EN50438
- Force majeure
- Incidental or consequential damage

No employee, representative or distributor is authorised to offer warranties for or on behalf of ENNERA.

ENNERA reserves the right to introduce any changes or modifications to the design of the WINDERA S wind turbine, with no obligation whatsoever to include these changes or modifications

to the equipment installed prior to these changes or modifications.

If required, the customer has the option to request an extension to the warranty for a specified number of years, up to a maximum of 5 years of the useful life of the equipment and at a cost that will be calculated according to the extension requested.

The extension to the warranty may only be requested if the customer signs a preventative maintenance contract with ENNERA, before the end of the first operational year of the equipment. The customer undertakes to comply with the recommendations and interventions that are declared in the periodic maintenance reviews.

Ibarra, 2015
